

Request for Qualifications & Proposal to Prepare a Feasibility Study for Sakai Park

QUESTIONS/ANSWERS

1) Submission date?

The Sakai Park Feasibility Study is due on July 27.

2) Preference for Landscape Architects or Architects as lead?

No preference as for lead, but the talents of each profession will be involved in the project tasks.

3) Is the proposal/scope expected for the design of both park & building development?

Yes, but certain elements are well explored, such as buildable area related to storm water and expected sewer hook-up; defining elements where your team sees specific engineering or design inquiry tasks/elements will be important.

4) Is a cost estimator or facilities' operation specialist needed?

We anticipate that these tasks would be addressed and that a qualified team member would be represented to do such tasks on the RFQ submission.
