

## Are You Traveling This Summer?

Because travel increases your chances of getting infected and spreading COVID-19, staying home is the best way to protect yourself and others from getting sick. We understand that it's enjoyable and healthy to leave on vacation, and some travel is necessary. Before participating in any activity with the Park District, please consider the below mentioned points by the CDC and our staff before traveling and returning home. If you feel you or those you were traveling with were compromised in any way or have doubts, please do not attend any activity. Give notification to the Park District so we can then issue a refund per our refund policy.

- Where are you traveling? Is COVID-19 spreading where you are going?
- Will you or those you are traveling with be 6 ft. from others during your trip? If not, this will increase your chances of getting sick with COVID-19.
- Will you or those you are traveling with wear mask during your trip? If not, this will increase your chances of getting sick with COVID-19.
- Will the method you are traveling be the safest for you and those who you are traveling with? Different modes of transportation may increase your risk of getting sick with COVID-19. Traveling by car may be healthier than traveling by plane.
- If you are an individual who has an increased risk of getting COVID-19, have you considered not traveling?
- Upon returning home, reflect on who you and those you traveled with visited. Was anyone sick? Did anyone have the symptoms of COVID-19? Did you know the social habits of those you traveled with or those you visited?
- Should you and/or others you traveled with self-quarantine for 14 days or get tested for COVID-19 after several days of being home?

---

We thank all those you who continue to support the Bainbridge Island Metro Parks and Rec through participation in our programs. Have an enjoyable, safe and healthy summer!
